## OBJECTIVE

---

**MERN stack developer with strong skills in frontend and backend development. Proficient in building responsive interfaces and collaborating in team environments.**

## EDUCATION

---

**Rungta College of Engineering & Technology, Bhilai**

Expected graduation date: June, 2025

*B.Tech in Computer Science and Technology*

**B.S.P Senior Secondary School Sec-4, Bhilai**

2021

*CBSE*

## SKILLS & EXPRETISE

---

**Programming Languages :** Java(DSA), JavaScript, Typescript, SQL, HTML5, CSS3, SASS

**Technologies & Tools :** React, Redux, Tailwind CSS, Node.js, Express, MongoDB, Git/GitHub, Bootstrap, Figma

**Languages :** English, Hindi.

## PROJECTS

---

**ConnectHub** | *React, Redux Toolkit, Node.js, Express.js, MongoDB, SASS*

- Led the creation of a full-stack social media platform, integrating MongoDB for secure data storage.
- Engineered advanced user interactions, including signup/login, following, liking, and commenting. Additionally, designed an intuitive user dashboard for efficient post management and profile customization.
- Implemented advanced user interactions, allowing users to follow, like, and comment on posts. Ensured efficient handling of user-generated content, fostering a dynamic and engaging social media experience.

**Shoppiee** | *React, Redux Toolkit, Node.js, Express.js, MongoDB, Passportjs, Stripe Payment, Nodemailer*

- Developed a feature-rich ecommerce web application using React, Redux, Express.js, Node.js, and MongoDB, ensuring seamless user experience and data management.
- Integrated Stripe payment gateway for secure and efficient online transactions, enhancing the platform's functionality and user convenience.
- Implemented an admin dashboard with product management features and integrated Nodemailer for email functionality, enhancing site management and user experience.

**iNoteBook** | *React, Nodejs, Expressjs, MongoDB, Bootstrap*

- Engineered a full-stack todo web application using React, Node, and Express.
- Developed robust user authentication with signup/login features. Employed MongoDB for efficient data storage, ensuring a secure and scalable solution. You can add , edit and delete all the tasks.
- Integrated alert system for timely notifications, enhancing user experience. The application notifies users about important events and changes, improving overall usability and understanding of task management.

## ACHIEVEMENTS & CERTIFICATIONS

---

**4<sup>th</sup> Place in a college level competition (FrontXStorm)**

2023

Created a Frontend of a Sunglasses store website using gsap.

**The Complete Web Developer Bootcamp 2023, Udemy**

July 2023

Completed this certification on Udemy.

**JAVA, Sololearn**

April 2023

Completed this certification on Sololearn.

**Data Structure & Algorithm (JAVA), Coding Spoon.**

June 2023

Completed this Course with Coding Spoon.
